

Boost workforce training and compliance with PowerHouse Upskill

Manage your workplace upskilling with mobility and compliance apps

The next generation of Learning Management Software

www.powerhouseupskill.com

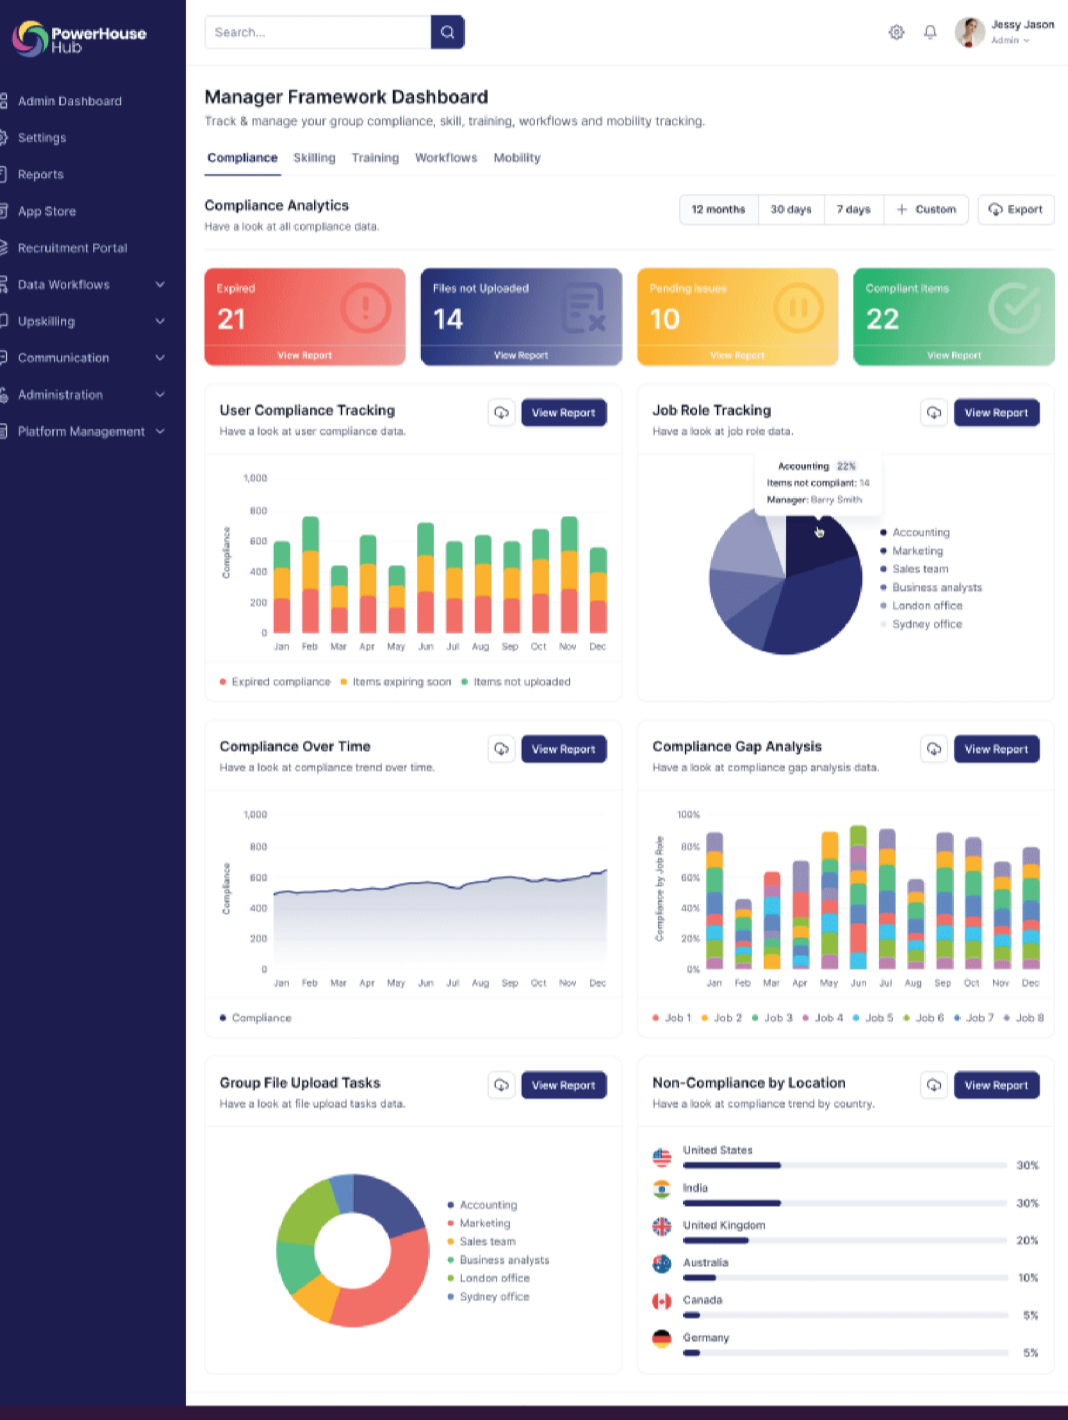

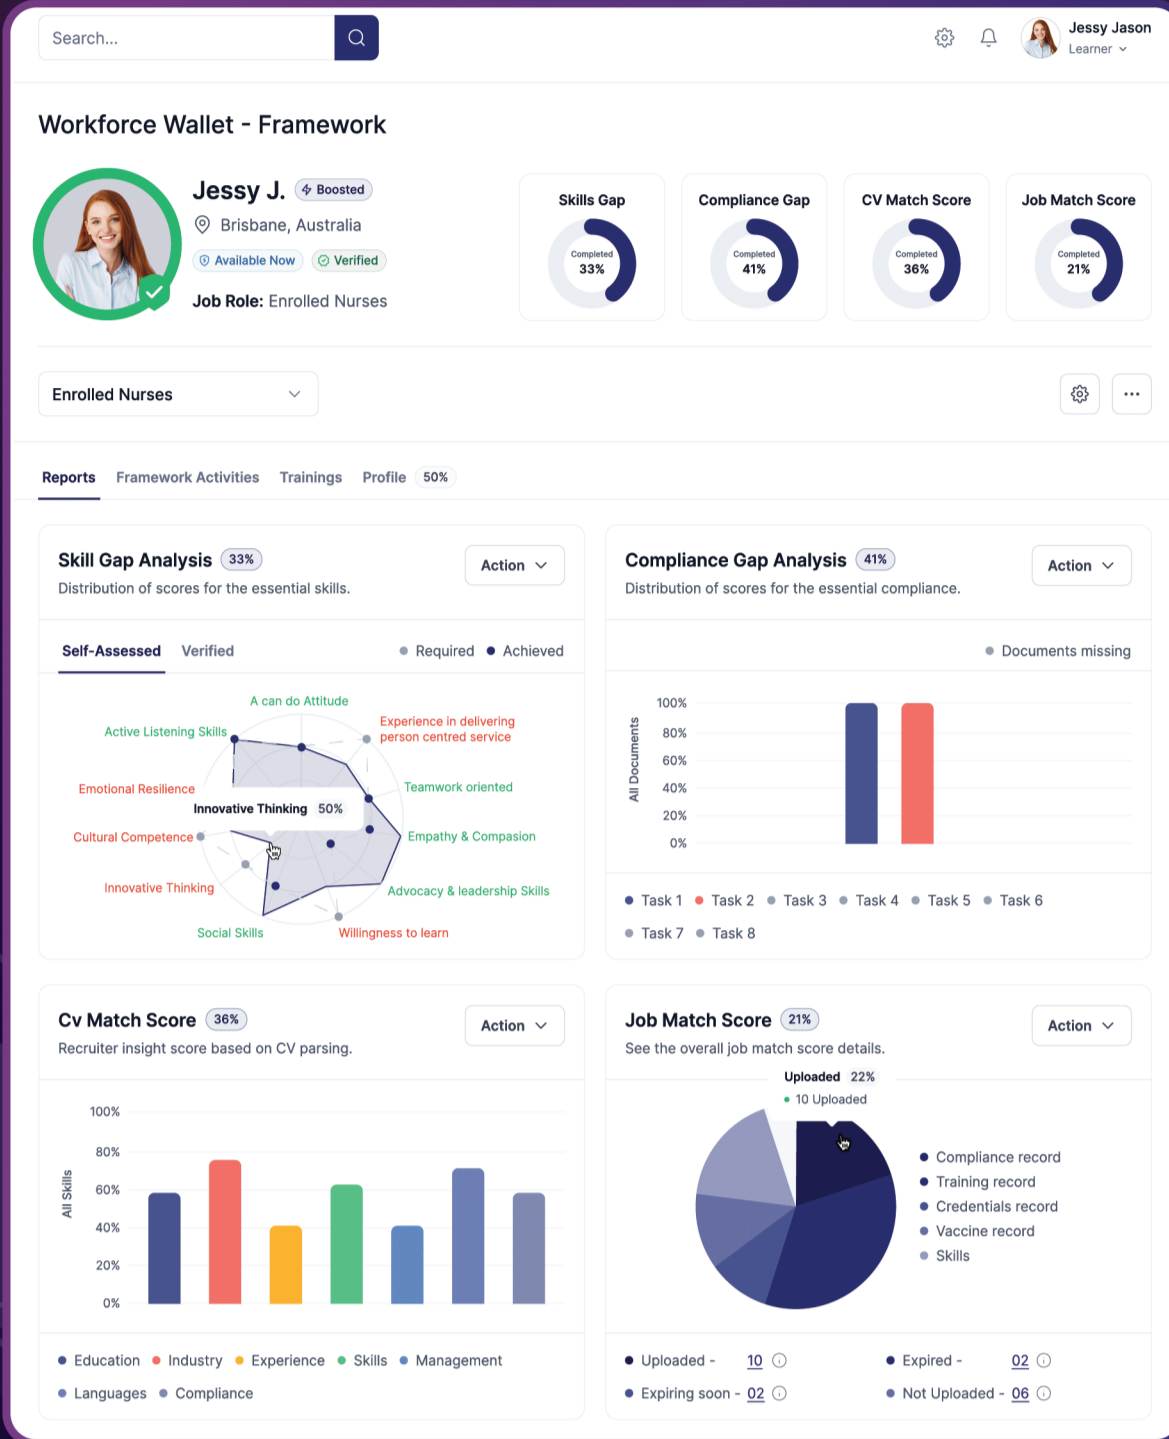

PowerHouse Upskill

PowerHouse Upskill is the next generation LMS. The software delivers a stunning eLearning platform with the unrivalled ability to provide upskilling and compliance on every job role.

Upskill publishes personal Workforce Wallets that monitor and guide the skills and compliance gap for all of your users. Visual data analytics are pushed dynamically to workers, managers and administrators to drive workforce productivity.

Upskill tools feature course publishing, event and webinar management, pre-screen, onboard and appraisal workflows, dynamic communication and integration with payroll and HR and reporting systems.

PowerHouse Job Role Compliance

Extend the capability of the PowerHouse Upskill platform with Job Role Compliance and Upskilling. Drive your productivity and performance while ensuring your workforce is compliant and skilled.

Job role frameworks ensure your employees understand their roles and responsibilities to maintain legal and regulatory standards. This promotes ethical behaviour and mitigates risks.

Senior executives view real-time data analytics and reports on job role compliance and upskilling. Visual graphs plot compliance and skill gaps with action to resolve issues.

PowerHouse Mobility App

PowerHouse Talent Mobility provides the essential tools to help manage your succession plans and career pathways for your staff. The product delivers seamless skill and compliance mapping to drive workforce optimisation for your business growth. Your team is ranked in job role talent pools to dynamically discover the top talent in your business.

Discover your high achievers in ranked job role Talent Pools

By assigning your employees to one or more framework job roles they follow a guided path to continuously improve their compliance and competency levels. PowerHouse Talent Mobility creates dynamic Talent Pools for each job role and employees are ranked in these pools based on their skill and compliance gap analyses, job match scores, CV insight scores, and appraisal outcomes.

Job role profiling questions allow HR to map a user's compliance and credentials to find the right talent for a new project or an upcoming job role.
